Hwy. 350 and NW Colburn Rd.  
near Lee's Summit, MO

Sunset will be around 8:45 p.m.,  
leaving plenty of time to explore the  
courtyard. The attached map shows  
where to park and where to convene  
for the meeting. The fountains,  
buildings, and flowers offer  
something for everyone!

There is a nice 2.5 mile walking trail  
with a cave, two lakes, and  
wildflowers for those who would like  
to come out early and get some  
exercise.

## Sensor Cleaning

Club member Mark Greenberg was nice enough to send in his experience w/ getting his camera sensor clean w/a local company:

“Earlier this year, I noticed that all my images were showing a great number of sensor dust spots. Much time was spent in post processing getting rid of these photo spots. My attempts to clean the sensor with various cleaning aids in my Nikon D800 were not at all successful and may have made the situation worse. After some inquiries, I was directed to a business called ELECTRONIC SERVICES. They charge a nonrefundable fee for evaluating the camera. That fee is applied toward any charges incurred for further work. All my camera needed was a thorough sensor cleaning so my final total expense was about \$62.00. The sensor was perfectly clean and my images were spotless. I have decided that sensor cleaning is like owning a house—a certain budget should be allocated for yearly maintenance.”

## \*DD&B Flickr Group\*

For any Flickr users, be aware that there is now a Digital Dimensions Flickr Group. We would encourage any members with Flickr accounts to join & post to that group, specifically photos that were taken at or related to DD&B field trips or meetings. The group can be found [here](#).

[Flickr](#) is a great place to show your photos and is an excellent resource for gathering feedback & for getting questions answered. It has a huge number of very active groups on almost any photography topic or subject you can think of and is worth checking out.
